**Mathematics**  
**International Advanced Level**  
**Pure Mathematics P3**

**You must have:**

Mathematical Formulae and Statistical Tables (Yellow), calculator

Total Marks

**Candidates may use any calculator permitted by Pearson regulations. Calculators must not have the facility for symbolic algebra manipulation, differentiation and integration, or have retrievable mathematical formulae stored in them.**

**Instructions**

- Use **black** ink or ball-point pen.
- If pencil is used for diagrams/sketches/graphs it must be dark (HB or B).
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Answer **all** questions and ensure that your answers to parts of questions are clearly labelled.
- Answer the questions in the spaces provided  
– *there may be more space than you need.*
- You should show sufficient working to make your methods clear. Answers without working may not gain full credit.
- Inexact answers should be given to three significant figures unless otherwise stated.

**Information**

- A booklet 'Mathematical Formulae and Statistical Tables' is provided.
- There are 9 questions in this question paper. The total mark for this paper is 75.
- The marks for **each** question are shown in brackets  
– *use this as a guide as to how much time to spend on each question.*

**Advice**

- Read each question carefully before you start to answer it.
- Try to answer every question.
- Check your answers if you have time at the end.
- If you change your mind about an answer, cross it out and put your new answer and any working underneath.
- Good luck with your examination.

### Question 2 continued

DO NOT WRITE IN THIS AREA

DO NOT WRITE IN THIS AREA

DO NOT WRITE IN THIS AREA

Blank lined area for writing the answer to Question 2.

(Total 9 marks)

Q2

3. (i) Find

$$\int \frac{12}{(2x - 1)^2} dx$$

giving your answer in simplest form.

(2)

(ii) (a) Write  $\frac{4x + 3}{x + 2}$  in the form

$$A + \frac{B}{x + 2} \text{ where } A \text{ and } B \text{ are constants to be found}$$

(b) Hence find, using algebraic integration, the exact value of

$$\int_{-8}^{-5} \frac{4x + 3}{x + 2} dx$$

giving your answer in simplest form.

Question 4 continued

DO NOT WRITE IN THIS AREA

DO NOT WRITE IN THIS AREA

DO NOT WRITE IN THIS AREA

Lined area for writing the answer to Question 4.

(Total 10 marks)

Q4

Two empty boxes for marking the question.

6. Given that  $k$  is a positive constant,

(a) on separate diagrams, sketch the graph with equation

(i)  $y = k - 2|x|$

(ii)  $y = \left| 2x - \frac{k}{3} \right|$

Show on each sketch the coordinates, in terms of  $k$ , of each point where the graph meets or cuts the axes.

(4)

(b) Hence find, in terms of  $k$ , the values of  $x$  for which

$$\left| 2x - \frac{k}{3} \right| = k - 2|x|$$

giving your answers in simplest form.

DO NOT WRITE IN THIS AREA

Handwriting practice area with 25 horizontal lines.

**(Total 5 marks)**

Q7

8. A scientist is studying a population of fish in a lake. The number of fish,  $N$ , in the population,  $t$  years after the start of the study, is modelled by the equation

$$N = \frac{600e^{0.3t}}{2 + e^{0.3t}} \quad t \geq 0$$

Use the equation of the model to answer parts (a), (b), (c), (d) and (e).

- (a) Find the number of fish in the lake at the start of the study. (1)

- (b) Find the upper limit to the number of fish in the lake. (1)

- (c) Find the time, after the start of the study, when there are predicted to be 500 fish in the lake. Give your answer in years and months to the nearest month. (4)

- (d) Show that

$$\frac{dN}{dt} = \frac{Ae^{0.3t}}{(2 + e^{0.3t})^2}$$

where  $A$  is a constant to be found.

(3)

Given that when  $t = T$ ,  $\frac{dN}{dt} = 8$

- (e) find the value of  $T$  to one decimal place.

*(Solutions relying entirely on calculator technology are not acceptable.)*
