Division Worksheets

Match the equal expressions.

$24 + 2$ $36 + 3$ $39 + 3$ $26 + 2$

$(30 + 3) + (6 + 3)$ $(30 + 3) + (9 + 3)$ $(20 + 2) + (6 + 2)$ $(20 + 2) + (4 + 2)$

Nell draws the array below to find the answer to the division fact $24 \div 2$. Explain Nell's strategy.

Nell breaks apart 24 in 6 twos and 6 twos. 6 twos = 12. So she does $12 \div 2$ for both parts and adds the answers to get $24 \div 2$.

← $(12 \div 2) = 6$

$6 + 6 = 12$

← $(12 \div 2) = 6$

$24 \div 2 = 12$
