2. 1,188 kilograms of rice are divided into 7 sacks.

a. How many kilograms of rice are in each sacks of rice?

b. How many kilograms of rice remain?

## Division Word Problems Worksheets

1. There are as many cows as goats on a farm. All the cows and goats have a total of 1,112 legs. How many goats are there?

$$1112 \div 4 = 278$$

$$278 \div 2 = 139 \text{ goats}$$

2. 1,188 kilograms of rice are divided into 7 sacks.

a. How many kilograms of rice are in each sack of rice?

b. How many kilograms of rice remain?

$$1188 \div 7 = 169 \text{ R } 5$$

a. There are 169 kg of rice in each sack.

b. There are 5 kg of rice left.
