

Division Word Problems Worksheets

1. 500 milliliters of juice was shared equally by 4 children. How many milliliters of juice did each child get?

2. Kelly separated 618 cookies into baggies. Each baggie contained 3 cookies. How many baggies of cookies did Kelly make?

3. Jeff biked the same distance each day for 5 days. If he traveled 350 miles altogether, how many miles did he travel each day?

Division Word Problems Worksheets

1. 500 milliliters of juice was shared equally by 4 children. How many milliliters of juice did each child get?

$$500 \div 4 = 125$$

Each child will get 125 milliliters of juice.

2. Kelly separated 618 cookies into baggies. Each baggie contained 3 cookies. How many baggies of cookies did Kelly make?

$$618 \div 3 = 206$$

Kelly made 206 baggies of cookies.

3. Jeff biked the same distance each day for 5 days. If he traveled 350 miles altogether, how many miles did he travel each day?

$$350 \div 5 = 70$$

He travelled 70 miles per day.
