Multiply Fractions and Whole Numbers

Multiply the fractions & whole numbers. Use canceling when possible,

$\dfrac{1}{5}$ x 4 =

$\dfrac{6}{8}$ x 8 =

$\dfrac{2}{9}$ x 3 =

$\dfrac{3}{4}$ x 10 =

$\dfrac{2}{3}$ x 6 =

$\dfrac{3}{5}$ x 13 =

$\dfrac{2}{7}$ x 2 =

$\dfrac{6}{8}$ x 18 =

Multiply Fractions and Whole Numbers

Multiply the fractions & whole numbers. Use canceling when possible,

$$\frac{1}{5} \times 4 = \frac{4}{5}$$

$$\frac{6}{8} \times 8 = \frac{6}{1} = 6$$

$$\frac{2}{9} \times 3 = \frac{2}{3}$$

$$\frac{3}{4} \times 10 = \frac{15}{2} = 7\frac{1}{2}$$

$$\frac{2}{3} \times 6 = \frac{4}{1} = 4$$

$$\frac{3}{5} \times 13 = \frac{39}{5} = 7\frac{4}{5}$$

$$\frac{2}{7} \times 2 = \frac{4}{7}$$

$$\frac{6}{8} \times 18 = \frac{27}{2} = 13\frac{1}{2}$$
