

## Simplify Proper Fractions

Simplify the following proper fractions.

$$\frac{7}{28} = \underline{\quad}$$

$$\frac{8}{16} = \underline{\quad}$$

$$\frac{20}{50} = \underline{\quad}$$

$$\frac{18}{36} = \underline{\quad}$$

$$\frac{10}{20} = \underline{\quad}$$

$$\frac{2}{8} = \underline{\quad}$$

$$\frac{6}{24} = \underline{\quad}$$

$$\frac{10}{50} = \underline{\quad}$$

$$\frac{21}{70} = \underline{\quad}$$

$$\frac{6}{12} = \underline{\quad}$$

$$\frac{16}{24} = \underline{\quad}$$

$$\frac{6}{15} = \underline{\quad}$$

$$\frac{12}{18} = \underline{\quad}$$

$$\frac{15}{50} = \underline{\quad}$$

$$\frac{30}{50} = \underline{\quad}$$

$$\frac{18}{45} = \underline{\quad}$$

$$\frac{27}{30} = \underline{\quad}$$

$$\frac{16}{40} = \underline{\quad}$$

$$\frac{3}{9} = \underline{\quad}$$

$$\frac{5}{25} = \underline{\quad}$$

$$\frac{3}{6} = \underline{\quad}$$

$$\frac{7}{28} = \underline{\quad}$$

$$\frac{6}{18} = \underline{\quad}$$

$$\frac{9}{27} = \underline{\quad}$$

## Simplify Proper Fractions

Simplify the following proper fractions.

$$\frac{7}{28} = \frac{1}{4}$$

$$\frac{8}{16} = \frac{1}{2}$$

$$\frac{20}{50} = \frac{2}{5}$$

$$\frac{18}{36} = \frac{1}{2}$$

$$\frac{10}{20} = \frac{1}{2}$$

$$\frac{2}{8} = \frac{1}{4}$$

$$\frac{6}{24} = \frac{1}{4}$$

$$\frac{10}{50} = \frac{1}{5}$$

$$\frac{21}{70} = \frac{3}{10}$$

$$\frac{6}{12} = \frac{1}{2}$$

$$\frac{16}{24} = \frac{2}{3}$$

$$\frac{6}{15} = \frac{2}{5}$$

$$\frac{12}{18} = \frac{2}{3}$$

$$\frac{15}{50} = \frac{3}{10}$$

$$\frac{30}{50} = \frac{3}{5}$$

$$\frac{18}{45} = \frac{2}{5}$$

$$\frac{27}{30} = \frac{9}{10}$$

$$\frac{16}{40} = \frac{2}{5}$$

$$\frac{3}{9} = \frac{1}{3}$$

$$\frac{5}{25} = \frac{1}{5}$$

$$\frac{3}{6} = \frac{1}{2}$$

$$\frac{7}{28} = \frac{1}{4}$$

$$\frac{6}{18} = \frac{1}{3}$$

$$\frac{9}{27} = \frac{1}{3}$$
